

GEODIFF Workshop - GEODIFF 2013

21 February 2013 – 24 February 2013

Chair

Aymeric Histace

ETIS UMR CNRS 8051; IUT de Cergy-Pontoise, France

Scope

The main aim of this special session is to bring together researchers who are interested in variational methods and by multi agent system in order to (i) reflect on a state-of-the-art on their abilities to model reaction-diffusion processes, and (ii) to discuss potential new applications since these two different types of tools are not generally associated with each other whereas such a joint applications can be of primary interest to model complex diffusion process at different scales of the phenomenon.

A second objective of this special session, but not necessarily less important than the first one, is to imagine through this particular application context new tools that will find future applicability in image processing (image restoration or inpainting mainly).

Important Dates

- Paper Submission: November 8, 2012
- Authors Notification: December 6, 2012
- Final Paper Submission and Registration: December 18, 2012
