

Project ELIOT - "Enabling Technologies for IoT"

6 11 2018 16:41

ETIS is pleased to announce that V. Belmega (Sci. Coord.) jointly with A. Chorti, I. Fijalkow, I. Andriyanova, J. Lorandel and L. Faurini obtained the highly challenging ANR PRCI funding for the project ELIOT - "Enabling Technologies for IoT".

ELIOT is a four-year international collaborative project (2019 - 2023) between ETIS-ENSEA and University of Sao Paulo and PUC-Rio, Brazil. The allocated budget for ETIS is around 390k euros, which will serve to hire one PhD student, 2 post-docs (two years each), and one MSc intern.
