

Training School on Machine Learning for Communications

9 10 2019 10:57

As part of the activities carried out by the IEEE ComSoc Machine Learning for Communications Emerging Technologies Initiative, Marwa Chafii (Associate Professor at ENSEA, ETIS) has co-organized a Training School on Machine Learning for Communications on 23-25 September 2019.

The latest advances in the field of machine learning for communications were presented in this training school by internationally-renowned researchers from academia and industry.

It was a pleasure to welcome in Paris, 77 attendees who came from 14 different countries to attend this event.
